NOTES ON SOME OF THE MORE IMPORTANT FIGURES CONTAINED IN THIS VOLUME.

Following the usual custom, an abstract of particulars in each part is presented with this issue. From the records published therein it will be seen from the latest figures given that, with few exceptions, steady progress has again marked the operations of this State.

Owing to an alteration of dates for some of the parts, following on the Statistical Conference, it has been found possible to include the latest published figures of Part IV., "Interchange"; consequently issues of that part appear for two years.

I grtaefully acknowledge the assistance of all Government Officers and others who have kindly supplied figures for the respective branches or business concerns under their supervision.

S. BENNETT,
Government Statistician.

Government Statistician's Office,
Perth, Western Australia,
16th May, 1927.

PART I.—POPULATION AND VITAL STATISTICS, 1925.

On the 31st December, 1924, the population of the State consisted of 195,341 males, 168,783 females, making a total of 364,124 persons, whilst the figures on 31st December, 1925, were 199,596 males, 172,587 females, or a total of 372,183 persons, the gain for the year being 4,255 males, 3,804 females—total persons 8,059. Of this increase the gain in births over deaths was 2,053 males and 2,817 females, and by migration 2,202 males and 987 females.

The arrivals during the year 1925 numbered 20,358 males, 12,562 females, totalling 32,920 persons, whilst the departures were those of 18,156 males, 11,575 females—totalling 29,731.

Comparing the arrivals and departures by sea to and from the Eastern States, the arrivals numbered 7,471 persons, whilst the departures were 8,798, showing a loss of 1,327 persons. The returns from overland sources also show a loss of 1,432 persons, the figures being—arrivals 15,472 and departures 16,904.

From oversea sources the arrivals were 9,977 and departures 3,113, showing a gain by oversea migration of 6,864 persons.

The allowance made for unrecorded departures numbered 916, comprised of 598 males and 318 females.

The births for the year numbered 4,210 males, 3,975 females (exclusive of still-born and legitimated births), showing a decrease of 5 males and 111 females on the previous year's figures. The birth rate was 22.2 per 1,000 as against 23.1 for 1924.

Illegitimate births numbered 335, showing an increase of eight on the 1924 figures.

The deaths registered were those of 2,157 males and 1,158 females, or a total of 3,315, showing an increase of 118 male deaths and a decrease of 66 in the female deaths, the death rate being 9.0 as against 9.1 for 1924.

The increases for existing local policies over the previous year were as follows:—Assurance, 2,093 policies, and sum assured £1,086,982; endowments, 344 policies and £127,514; annuities, however, reveal a falling off of £127 per annum.

Six of the companies were also doing industrial business in the State during the year, and the new transactions were for assurances 15,716 policies for £736,576, with annual premiums amounting to £46,427, and endowments 1,978 policies for £111,673, with annual premiums amounting to £7,020. This business also discloses increases over that of the previous year in assurances of 3,921 policies and sum assured £222,124, and endowments of 320 policies for £3,359.

General Insurance.—The Western Australian transactions of companies operating in this State reveal a total revenue of £853,649, and expenditure of £719,255, which figures are in excess of those for the previous year by £76,444 and £129,138 respectively. £361,979 was paid out in losses as compared with £271,565 in 1924.

The funds at the end of the year totalled £368,944, of which £358,946 was invested. There were in addition 24 specially authorised societies, the total revenue of which amounted to £16,084, and expenditure to £16,968. The funds invested at the end of the year totalled £14,384, and those uninvested £705. On the above date there were 15 building societies with a membership of 10,280 persons holding 30,060 shares. In comparison with the 1920-21 figures the total imports for 1924-25 show a decided increase. Some of the increases according to country of origin are as follows:—United Kingdom £792,603; Ceylon £112,330; India £141,690; Germany £114,635; France £89,039; Italy £47,179; and United States of America £611,720. The following decreases will be observed:—Commonwealth States £513,774; British Malaya £130,061; South African Union £74,243; Belgium £35,421; and Sweden £60,803.

The exports were principally Western Australian primary products. It is interesting to note that while we sent to British possessions goods to the value of £9,321,494 in 1924-25 we purchased from the same source goods to the value of £12,512,485. Foreign countries purchased our primary products to the value of £4,849,692 during 1924-25 and sold us goods to the value of £3,561,550. The export of merchandise, principally of Western Australian origin, shows a very substantial increase during the past three years, the figures being:—1922-23, £8,886,333; 1923-24, £12,201,525; and 1924-25, £14,148,408.

Customs and Excise.—In addition to the gross and net collections particulars are given of the stocks of principal articles in bond, also excise duties and collections on spirits, beer and tobacco.

The exports were principally Western Australian primary products. In 1925-26 we sent to British possessions outside the Commonwealth goods to the value of £8,489,671, and we purchased from the same source goods to the value of £5,236,814. Foreign countries purchased our products to the value of £4,121,960 during 1925-26 and sold us goods to the value of £3,580,796.

The export of merchandise, principally of Western Australian origin, shows a substantial increase over 1923-24, the figures being:—1923-24, £12,201,525; and 1925-26, £13,728,727.

Customs and Excise.—In addition to the gross and net collections covering a period of ten years, the amounts collected at each port and on each item for the year are shown, also the Excise duties collected on spirits, beer and tobacco, followed by the stocks of principal articles in bond as at 30th June, 1926.

Transport and Communication—

Shipping.—Amongst the tables dealing with shipping, Table 25 showing the total activity at each port, including intra-State movements, is of special interest.

Land Transport.—Tables 35-48 deal with Government, municipal, and privately owned railways, tramways and motor omnibuses, and serve to show what a large part transport plays in the development of our State.

The sharp rise in motor passenger traffic during the year ended 30th June, 1926, is clearly set forth in Table 45, also the phenomenal increase in motor vehicles of all kinds registered in the State.

Posts, Telegraphs, Etc.—Tables 49-60 deal with all the varied activities controlled by the Deputy Postmaster General's Department, as well as with the radio traffic handled at each station.

The transactions of the Fremantle Harbour Trust and the Bunbury Harbour Board will be found on page 121.

Part V.—Land Settlement, Agriculture, Live Stock, and Meteorological Statistics, 1925-26.

Land Settlement.—On the 30th June, 1926, the area of land absolutely alienated was 11,688,569 acres, and that in process of alienation 18,588,989, whilst 230,562,767 was then held under lease or license. During the year 1925-26 3,665 lots, totalling 704,786 acres, were absolutely alienated and applications were approved for 2,579 lots containing 2,022,007 acres under conditional alienation. Of the 484,300 acres of land held under the Agricultural Lands Purchase Act on 30th June, 1926, 387,312 acres were selected, and of the 258,190 acres purchased for soldier settlement 252,132 acres selected.

The holdings of alienated lands and lands in process of alienation from which returns were collected during the year numbered 18,977, covering 21,303,481 acres, and from Crown lands held under lease or license 864 for an area of 187,889,212 acres.

The total area of land cropped, cleared and being prepared for cropping during the season 1925-26 amounted to 9,757,189 acres, which was in excess of the previous season by 657,256 acres. The estimated values of improvements on holdings were for buildings for sheltering stock, produce and machinery £2,313,286, and implements and machinery £5,238,681, whilst the numbers of wells and dams thereon were 26,145 and 18,441 respectively.

Agriculture.—This industry was not so prolific in 1925-26 as that of the previous season. The value of production, based on metropolitan sales, totalled £9,749,016, which was a decrease on the 1924-25 value of £1,430,493. This method of making the valuation, which has been shown for comparison, has now been altered and the new manner of arriving at the value is based on what is called the "farm value," i.e., the amount that would be available after deducting cost of containers, marketing, seed and other expenses, other than labour. The value for 1925-26 thus obtained amounts to £6,584,646.

The acreage under crop (2,932,110 acres) is greater by 221,254 acres than for the previous season; the production, however, of all cereal and root crops, with the exception of malting barley, peas, beans, onions and mangles, which are slightly greater, show smaller yields than in 1924-25.

The production of citrus fruits shows a falling off on that for the previous year, which is also the case with regard to apples, figs and quinces. The season was, however, more favourable for stone fruits and pears, which in all cases show increases. The production of grapes, under all headings, reveals an increase on the results of the previous year, the total yield being 206,750 cwts., or 42,335 cwts. more than in 1925. Although the drying grapes accounted for 37,000 cwts. of the increase shown above the quantity of fruit dried from the season's crop (20,540 cwts.) is a slight falling off on that of the previous year. The production of wine (238,762 gallons), however, reveals an increase of 15,001 gallons.

The quantity of seed wheat sown in 1925 was 2,328,815 bushels, and like that of the past nine years averaged one bushel per acre. The amount of natural manure used was 65,695 loads on 7,312 acres or an average of nine loads per acre, and artificial manures 2,561,837 cwts. on 3,008,335 acres, or an average of 0.9 cwts. per acre.

The area of land irrigated during the season was 3,551 acres, which was 436 acres more than in 1924-25, and the principal crops treated were lucerne, green feed, maize, fruit, and vegetables. The figures shown for the quantity of butter, bacon, and ham produced are greatly in excess of the previous year, but as these items include the amounts produced in factories for 18 months a fair comparison is not possible. Milk production and poultry keeping are on the up-grade but beekeeping shows a considerable falling off.

The number of persons permanently employed in farming was 24,640; dairying, 2,386; orchards, vineyards, and market gardens, 2,877; and pastoral pursuits, 6,496. Included in these numbers were 440 Asiatics and 3,320 aboriginals.

The value of products imported into the State during 1925-26, which could be produced from the soil here, amounted to £3,217,215, which is £113,941 less than in the previous year.

Improvements effected in respect of money advanced under the Agricultural Bank Act to 30th June, 1926, were valued at £5,204,179, and the amount advanced under the Discharged Soldiers' Settlement Act £5,569,867. The Industries Assistance Board also made advances to settlers which totalled on the 31st March, 1926, £10,509,120, of which £8,788,548 has been repaid.

Livestock.—The numbers on the 31st December, 1925, reveal a decrease in all kinds except sheep, pigs and donkeys. Sheep show an advance of 465,231, pigs 7,941, and donkeys 277. The increase in sheep was mainly in the South-Western and Central portions of the State, and for pigs in the South-Western portion. Of the total number of sheep (6,861,795) the breeds consist of 6,319,135 merinos, 43,024 other pure breeds, 345,502 merino cross breeds, and 154,134 other kinds. The decrease in the number of cattle was mainly in the North and North-Western portion of the State, and was no doubt due to the droughts prevailing there during the past years.

Meteorological Statistics, 1925.—During the year an excess was experienced through the inland portions of the De Grey extending southwards through the East Gascoyne to the Goldfields and thence to the Bight. The North Kimberley also showed an excess, as well as a few centres in the agricultural districts. The excesses ranged from a few points to 11.09 inches at Widgiemooltha, 8.69 at Roy Hill, 8.51 at Wyndham, and 8.13 inches at Esperance. The remainder of the State showed defects, which were most pronounced in the East and West Kimberleys, throughout South-West coastal areas and in the West Gascoyne.

January and February, 1925, will long be remembered on account of the two "willy-willies" which developed in the North-West. The first centred at Roebourne where great destructon was wrought, and the other to the North of Condon, its greatest intensity being felt between that centre and stations on the route to Marble Bar and Nullagine. In both instances extensive rains resulted not only throughout the North-West but also over the Gascoyne, Goldfields, and Agricultural districts. Although the rains were widespread weaknesses were indicated from many stations in the North-West and on the Ashburton and Gascoyne, where the position was not actually relieved until the latter half of May, when a general downpour embracing all sub-tropical areas occurred, particularly useful falls being registered in the Ashburton and Gascoyne.

From June to November a comparatively dry period ensued through the Kimberley, North-West, and all pastoral districts, broken here and there by some useful falls. A remarkable downpour on the 20th and 21st June was productive of 5.66 inches at Onslow. This was a strictly local fall and did not extend any distance from that centre. In November, thunderstorms visited the Kimberley on several occasions and a few spasmodic showers were noted in the North-West and Gas-

coyne. Throughout the Goldfields thunderstorms were most frequent on the 5th, 12th, 13th and 26th of that month, while in December the Kimberley reported some fair gaugings. The best falls of all, however, were noted through the country from the De Grey River to Meekatharra, registrations of two and three inches being numerous. Thunderstorms were also reported from the East Gascoyne and goldfields.

In the agricultural districts the winter rains started on the 13th May, and the good falls which occurred towards the end of that month had the effect of giving the season an excellent start. This was well maintained during June, when splendid rains fell during the latter part of the month. Below average falls were met with throughout July, and the lack of rain during August, together with the severe frosts experienced, had the effect of retarding the crops which were in a backward condition, while pastures had also suffered from the cold dry weather. As a result of two good downpours on the 10th and 21st September, the agricultural position greatly improved, but heavy frosts still checked the growth of pastures. Another general rain on the 11th and 12th October still further improved the crop prospects.

Thundery conditions were greatly in evidence during November and December, and considerable damage to crops through hail was reported.

The season closed with crops on fallowed land showing, on the whole, good results, but the lack of rain during the critical periods of the season was plainly visible on the crops on unfallowed land.

Part VI.—INDUSTRIAL ESTABLISHMENTS, 1925-26.

The figures in this publication represent the result of operations in the industrial establishments of the State covering a period of 18 months ended 30th June, 1926. Particulars were previously collected for a period of 12 months ending in December, but in order to meet the convenience of business people and to bring the returns in line with those in the other States it was decided to alter the end of the period from December to June. The figures now published, therefore, are, in the main, not comparable with those shown for previous periods.

The Government Statisticians throughout the Commonwealth, by agreement, do not collect particulars from industrial establishments unless four or more hands are employed at any one time or mechanical power is used. Certain industries, such as bread-baking, photography, small goods manufacture, hitherto included in this Part, and comprising Class XX., are now disregarded.

During the period under review, allowing for the exclusion of industries under Class XX., there was a decrease of 18 in the number of factories operating as compared with the previous year, but the number of hands employed increased from 21,754 to 22,140. Wages paid during the 18 months amounted to £6,587,595 as against £4,127,839 during the preceding 12 months, the average amount per annum received by each employee being respectively £198 7s. 3d. and £189 15s.

The gross value of the output during the 18 months was £21,449,799, made up as follows:—Salaries and wages £6,587,595; fuel consumed, etc., £1,571,404; material used, £10,267,282; margin for profit and other expenses, £3,023,518. The analysis of the proportion per cent. of the various items of outlay to the total output show that the proportion expended on salaries and wages and for fuel consumed, etc., exceeded those for the previous period; the latter item, however, takes into account the value of containers, replacements, repairs to plant, etc., which were not included in previous years. The proportion of the item "Cost of material used" decreased from 53.17 per cent. in 1924 to 47.86 in 1925-26. The percentage of "margin for profit, etc., has fallen during the same period from 16.68 per cent. to 14.10 per cent.

Some of the principal items manufactured during the 18 months ended 30th June, 1926, were:—2,951,512lbs. of leather (78,897 hides and 2,855 skins being tanned); pottery, etc., to the value of £89,661; timber, hewn and sawn, 323,011,703 super feet; confectionery, 6,104,151lbs.; flour, 190,369 tons; beer and stout, 7,592,900 gallons; tobacco, 12,349 lbs.; electric light and power, 99,853,372 British units; gas, 373,854,300 cubic feet. The figures for pearl and pearlshell fisheries show that during the 18 months period shell to the value of £276,474, and pearls valued at £71,393, were raised.

Tables of the rates of wages fixed by the State Arbitration Court, and revised to the 30th June, 1926, complete the Part.

Items of interest were the establishment of the Albany Worsted and Woollen Mills and the resumption of operations in the whale-oil industry.

PART VII.—MINERAL STATISTICS AND WATER CONSERVATION, 1925-26.

This publication deals with the mineral statistics for the year ended 31st December, 1925, and water conservation for the year ended 30th June, 1926.

The estimated total value of gold and other minerals produced in the State during 1925 was £2,393,890, which, added to all that produced in previous years, makes a total of £164,306,841.

The quantity of raw gold exported, plus that received at the mint, during the year totalled 441,252 fine ounces, valued at £1,874,320, making a total production to 31st December, 1925, of 36,271,167 fine ounces valued at £156,659,725, including premiums realised on export sales up to 1924. The production of gold during 1925 was less by 43,783 ounces than in 1924.

The dividends paid during 1925 amounted to £54,109, and the total amount up to the end of 1925, £28,559,586.

There were 81,226 fine ounces of silver valued at £11,661 produced during 1925, which was 7,920 ounces less than in 1924. The total production of silver to the end of 1925 was 44,403,620 fine ounces, valued at £611,345.

The quantity of coal reported as having been produced during the year was 437,461 tons, valued at £363,203, which was 15,597 tons more than in 1924. The total production to end of 1925 was 7,258,979 tons, valued at £4,558,336.

The total values of the other more important minerals produced up to the end of 1925 were as follows:—Copper, £1,804,998; lead, silver lead, ore and concentrates, £889,780; pig lead, £628,956; and tin, £1,537,466.

The number of gold mining leases in force on 31st December, 1925, was 469, on which an average number of 5,009 men were employed.

Batteries, including those of the Government, with 1,272 head of stampers, besides other crushing mills, treated 800,298 tons of ore, which was 16,538 tons greater than in the previous year.

The value of the machinery used in the production of gold was estimated at £1,437,449. In addition there were 44 other crushing mills valued at £313,138. There were 1,002 men employed in the production of minerals other than gold on 246 leases during the year.

Mining accidents numbered 395, which was 154 more than in the previous year. Twelve were killed and 383 injured.

1,680,646 sovereigns were minted at the Royal Mint during the year ended 30th June, 1926, whilst the total number produced since its establishment in the State was 98,379,864 sovereigns and 367,338 half-sovereigns.

The consumption of water during the year ended 30th June, 1926, from the Goldfields Water Supply amounted to 1,161,000 thousands of gallons, and the revenue derived therefrom to £179,402. From the Metropolitan Water Supply the consumption amounted to 3,131,144 thousands of gallons.

The number of consumers in the metropolitan area, including Armadale, was estimated at 184,000, and the number of houses supplied from this service was 42,302. The Mundaring Reservoir furnished 277,814 thousands of gallons in this connection.

The revenue for 1925-26 from the Metropolitan Water Scheme totalled £149,176, whilst the expenditure for the same period was £188,236. £80,165 was expended on sewerage and drainage and £93,600 derived in revenue therefrom.

The consumption of water in the country and other goldfields towns having separate supply schemes under the control of the Public Works Department is also given, likewise statistics relative to deep and artesian boring operations, tank and well sinking; whilst information relating to water supplies controlled by the Government Railways and Water Boards, with the consumption of water in the latter case; also the estimated population served; conclude this part of the Statistical Register.

PART VIII.—LAW, CRIME, ETC., 1925-26.

The statistics contained in this part of the Statistical Register are those of the transactions of the Land Titles Office up to the 30th June last; of Supreme Court business to 31st December, 1925; to the latter date, also, figures relative to cases brought before Magistrates' Courts, besides the general business of the Local Courts, Licensing Courts and Coroners' Courts; and finally an abstract of the latest gaols and prisoners statistics.

Transactions in the Land Titles and Deeds Office compared with those of the previous year show a decrease of 132 in the number of applications approved and completed. These totals exceeded those of the previous year by 679 cases and 513 convictions. There were, however, 151 fewer cases due to drink. The proportion of number of offences to the class of offence remained consistent in the main with that of the year before, the total increase being proportionately distributed over all the classes. Drunkenness decreased by 78 cases and 68 convictions, and accounted for 2,610 cases and 2,592 convictions of the total 7,080 cases and 6,713 convictions in the class of offences against good order. The total convictions, including aboriginals but excluding neglected children and lunacy cases, in all courts numbered 10,313, or 2.80 per cent. of the mean population, as against 2.72 per cent. in the previous year. The peremptory commitments to prison were 1,138 in the lower and 54 in the higher courts, whilst also 89 aboriginals from the lower and 16 from the higher courts were committed to prison. The gaols and prisoners statistics disclose an increase in the number of commitments and of distinct prisoners in the gaols for the year ended 30th June, 1926. The number of commitments was 2,324, and distinct prisoners 2,103. Prisoners in gaol on 30th June, 1926, numbered 237 and the daily average for the year was 263. PART XII.—MISCELLANEOUS, 1925-26.

The first subject dealt with in this publication is that of Parliamentary rolls and elections, giving the latest figures available for the State Government and for the Commonwealth as far as this State is concerned, information relative to the second prohibition poll and also a summary of the Commonwealth referenda from 1903 to 1925.

The recorded figures disclose that the number of electors on the State rolls for the Assembly had increased by 6,333, of which 2,524 were males and 3,809 females. The total on the Assembly rolls on 30th June, 1926, was 206,545. Similarly in the case of the Legislative Council rolls, an increase of 12,656 had taken place, comprising 9,528 males and 2,733 females. The total on these rolls was 70,057. The electors on the Commonwealth rolls also increased in number by 5,038, the total names on those rolls on the 30th June, 1926, being 190,373.

The data relative to the Workers' Homes Board show that during the past ten years 1,396 applications had been approved, and the total cost involved to have been £357,916.

Newspapers decreased by three in number during the year, 104 being in circulation on 31st December, 1925. Of these three were dailies, 54 weeklies and 30 monthlies.

The statement relating to the Returned Soldiers' League discloses that there were 110 branches and 4,220 members on 30th June, 1926, which was an increase of 12 branches and 172 members on the totals of the previous year. The receipts for the year was £1,865 and the expenditure £1,723, while the receipts and expenditure of the Soldiers' Institute were £501 and £514 respectively.

The State Labour Bureau's return shows that during the year ended 30th June, 1926, applications for work from 11,303 men and 1,354 women were received, and that engagements for 6,890 of the former and 1,715 of the latter (including re-engagements) were found. The principal engagements of men included 2,345 labourers, 1,498 bushmen, 807 farm hands, 457 lads for farms, 330 road formers,

257 handymen, 167 sawmill hands and 105 handy lads; whilst those of women included 1,238 charwomen, 107 generals and 67 cooks. STATISTICAL VIEW OF NINETY-SEVEN YEARS' PROGRESS IN WESTERN AUSTRALIA, 1829 TO 1925-26.

Although the subjects dealt with in this publication are given more fully in other parts of the Statistical Register, it is very interesting as showing at a glance the State's progress from year to year since 1890 and before then in decennial periods.

From the discovery of gold at Coolgardie in 1892 the State has made rapid strides, as disclosed by the figures shown in the publication then and now with regard to Population (58,658) 379,393; Revenue (£55,616) £8,907,309; Land Settlement (100,801,861 acres) 249,856,451 acres; Agriculture, area under crop (79,605 acres) 2,932,110 acres; Live Stock: Horses (44,963) 170,563; Cattle (162,886) 835,911; Sheep (1,685,500) 6,861,795; Pigs (24,417) 74,316; Government Railways, Miles open (453) 884; Savings Bank deposits (£74,926) £6,427,995; Imports (£1,391,109) £16,462,572; Exports (£882,148) £14,581,657; Shipping, Inward (572,000 tons) 3,268,883 tons. Figures in parentheses are for 1892. It also reveals the fact that whilst there has been a decline in the gold yield it has been more than compensated for by the steady progress in other primary industries.

(a) For future years the estimated value of production will be calculated on a different basis in accordance with a resolution passed at the Perth Statistical Conference held in August, 1926.

The figures for 1925 shown above in italics have been compiled in accordance with the resolution.

* The mean population for the year is obtained as follows:—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September, and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the population at the beginning and at the end of the quarter and dividing the sum so obtained by two.

No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1926.

Duties on British and Foreign Imports are collected under the provisions of the Commonwealth "Customs Tariff Act, 1921—1925" (George V., No. 25).

NOTE A.—On all British and Foreign Imports 10 per cent. has been added to the fair market value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

TRADE CLASSIFICATION.

No. 34.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board, and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred. The sinking fund of both Corporations is invested at an approved rate of interest.

NOTE.—In addition to the above figures the following particulars were also obtained:—Acreage of Planted Forest Trees, 1,575 acres; Lands farmed on the "Share System": For Cultivation, 38,279 acres and dairying, 1,756 acres. * The reason why Returns relative to certain alienated and leased lands are not obtained under the Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree to the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

No. 12.—Acreage and Production of Wheat and Oats in each Statistical District, Sub-District, and Area for the Season ended 28th February, 1926.

NOTES.—1. *The rectangular areas* adopted, which are shown on the map attached to this part of the *Statistical Register*, are comprised within the sheet lines of the Standard Plans of the Survey Department. Being permanently fixed they are units that can be readily sub-divided and re-grouped at any future time into new districts and sub-districts without impairing their use for comparative purposes. Except where the areas are broken by the sea coast or other causes, the area numbers here printed in black type represent areas of 8,437½ square miles each, whilst those printed in ordinary type represent areas of 937½ square miles each, and the sub-area numbers marked A, B, C, or D, as the case may be, represent areas of 234⅜ square miles each. 2. Areas in parentheses and marked with an asterisk (*) are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are unoccupied as regards the headings shown. Areas marked (†) are portions of areas only.

PART VI.—INDUSTRIAL ESTABLISHMENTS (Exclusive of Mines).

NOTES.—The Industrial Establishments here dealt with are those which, excluding Mines, come under the definition, adopted for statistical purposes, of Industrial Establishments, each being a "factory, workshop, or mill, where either four persons or more have been employed at any one time during the year, or where an engine driven by steam, gas, oil, or electricity has been used, whatever be the number of persons employed."
Class XX. particulars shown in previous years, have for 1925-26 been excluded in order to bring the classification into line with other States of the Commonwealth.

No. 1.—Classified numbers of Industrial Establishments (exclusive of Mines) from which Returns were received under the provisions of "The Statistics Act, 1907," and numbers of Males and Females employed, for each of the years 1920, 1924, and 1925-26.
